

CUSTOMER SHOPPING BEHAVIOR READOUT

# CUSTOMER SHOPPING IS STEADY, NOT SEASONAL

*Broad, even demand — with one clearer growth lever: convert more shoppers into subscribers.*

3,900 PURCHASE RECORDS

\$59

## CATEGORY MIX

# CLOTHING LEADS ON VOLUME; SPEND PER ORDER BARELY MOVES

Category

## AVERAGE PURCHASE AMOUNT

**Footwear** · \$60.26

**Clothing** · \$60.03

**Accessories** · \$59.84

**Outerwear** · \$57.17

*Category mix, not a large ticket-size gap,  
explains most observed scale.*

## SEASONAL DISTRIBUTION

# NO STRONG SEASONAL DEMAND SPIKE

## 955–999

Purchases per season — roughly one quarter each.

## ~~\$58.41~~ \$61.56

Mean purchase amount across seasons.

*Plan around product and campaign tests,  
not a presumed seasonal winner.*

## SUBSCRIPTION STATUS

# SUBSCRIPTIONS REACH JUST OVER ONE IN FOUR RECORDS

# 27%

1,053 "Yes" records out of 3,900.

Average purchase amount: \$59.49 for subscriber records versus \$59.87 for non-subscriber records; mean ratings are 3.75 in both groups.

*Opportunity: test a clearer subscription value proposition; measure incremental repeat rate and retention.*

## PURCHASE FREQUENCY LABELS

# BUYING CADENCE SPANS THE CALENDAR

Purchase frequency

*No single replenishment rhythm dominates.*

Labels range from 539 weekly records to 584 every-three-months records, with all seven listed cadences close in count.

These are frequency categories, not dated transaction intervals.

*Use lifecycle messaging tests by stated cadence.*

CUSTOMER EXPERIENCE SIGNAL

# RATINGS ARE SOLID, WITH ROOM TO DIAGNOSE FRICTION

# 3.75<sub>/5</sub>

Average rating across 3,863 nonblank reviews.

37 records have no rating.

## Cut by item

Find whether specific products create weak experiences.

## Cut by category

Locate patterns before setting a service target.

## Cut by shipping

Pair themes with delivery performance and returns.

*Diagnose the friction before prioritizing the fix.*

SAMPLE CONTEXT

# THE SAMPLE NEEDS CONTEXT BEFORE TARGETING

| OBSERVED CUT | RECORDS     |
|--------------|-------------|
| Male         | 2,652 · 68% |
| Female       | 1,248 · 32% |
| Age range    | 18-70       |
| Mean age     | 44.1        |

*Sample composition is not market demand.*

These are purchase records, not a representative population survey.

---

**Before demographic targeting:** validate collection scope and compare the sample with the retailer’s customer base.

*Source: supplied purchase-record file*

NEXT MOVES

# RUN THREE TESTS, THEN JUDGE INCREMENTAL LIFT

*Current file lacks transaction dates, costs, discounts' financial impact, and repeat-customer linkage; add these before measuring business impact.*

## 01 SUBSCRIPTION

**Test benefit framing against a holdout.**

Track conversion, repeat rate, and retention.

## 02 MERCHANDISING

**Test cross-sell placements.**

In high-volume clothing and accessories, track incremental basket value.

## 03 EXPERIENCE

**Link low-rated purchases to item and fulfillment signals.**

Fix the largest verified friction point.
